## Plant Design & Operating Strategies – World's Best Practice

11-12 September 2017 | Perth, Australia

**The conference will be held at the Pan Pacific Hotel in Perth, WA.**

### INVITATION TO SPONSOR AND EXHIBIT

MetPlant 2017 will concentrate on the practical matters of design and the development of themes associated with the World's Best Practices across whole of life of plants including:

- Plant design, from ore characterisation and geometallurgy to test work, process and equipment selection
- Feasibility studies including financial analysis and management strategies
- Design and construction of greenfield and brownfield plants, expansions and retrofits
- New technologies for and improvements in processing and plant control and instrumentation
- Construction and commissioning and planning for closure and rehabilitation
- Emissions management and energy efficiency
- Water and tailings management.

As with the highly successful earlier conferences in the series, the papers are expected to include mineral processing, hydrometallurgy, biometallurgy, pyrometallurgy, environmentally related aspects of plant operations, site remediation on closure and energy efficiency. Case studies and discussion of world's best practice in plant design, control and operations are encouraged.

Conference delegates will include design and maintenance engineers, operations managers, planning engineers, metallurgists and process engineers, equipment suppliers and consultants.

Sponsorship and exhibition booths offer highly cost-effective opportunities to make contact with delegates many of whom are decision makers within their operations and organisations. All sponsors and exhibitors will be acknowledged on the conference website, registration brochure, abstracts volume and proceedings.

Conference catering will be served within the trade exhibition area throughout the conference. The exhibition area is adjacent to the conference room.
